

Lær tallene 1-20

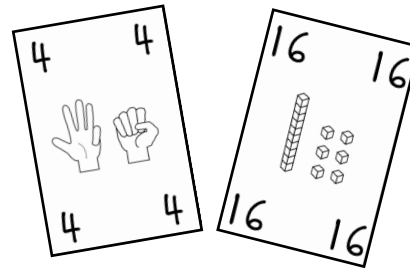

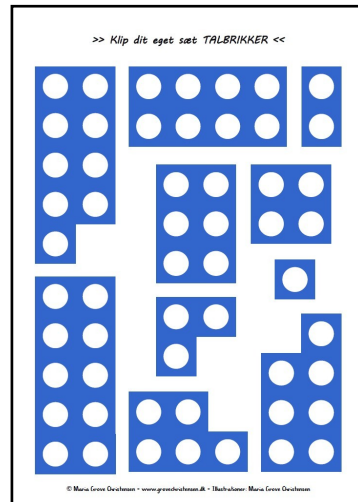

Disse arbejdsark omhandler tallene 1-20 og inddrager både talskrivning, talmængden på forskellige måder samt tælleremsen og tallets placering på en tallinje. En god forståelse af tallene og kendskab til mange forskellige repræsentationer af tallene danner et vigtigt grundlag for det videre arbejde med regnestrategier og matematik.

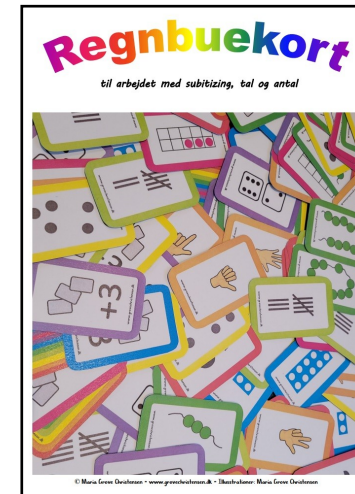

I kan starte med tallene 1-10 og senere arbejde videre med tallene 11-20.

Inspiration til flere aktiviteter i arbejdet med de første tal:

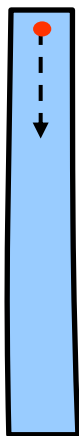

Prøv at bygge tallene på mange forskellige måde med numicons eller de tal-brikker i forskellige farver, som du kan printe på www.grovechristensen.dk På hvor mange forskellige måder kan man bygge 5?

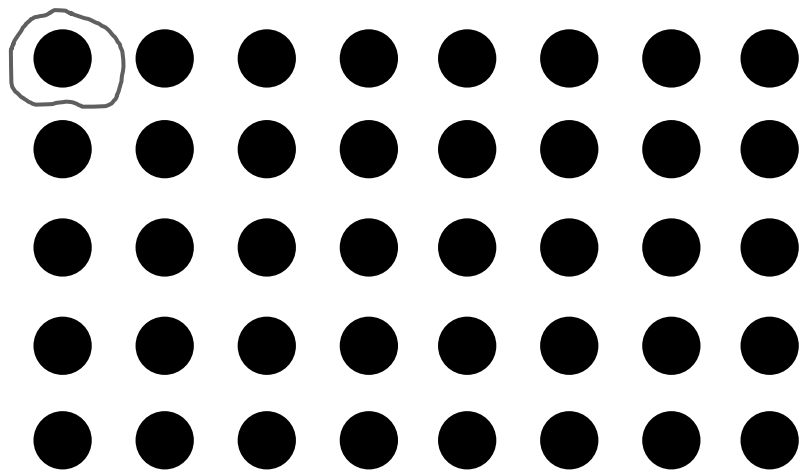

Spil FISK enten med tallene 1-10 eller 11-20 hvor man både hører, siger og ser tallene ude af rækkefølge.

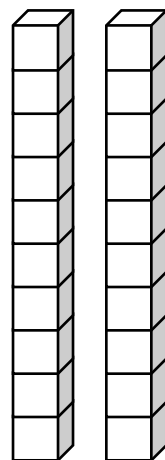

I arbejdet med tallene 1-10 kan I gå på jagt i bunken af REGNBUEKORT efter billeder, som passer til dagens tal.
